Release Date: August 29, 2011

**Construction on U.S. 17 ACE Basin Parkway Segment 2**

On Segment 2 of the U.S. 17 ACE Basin Parkway Widening project in Colleton County a temporary lane closure around the CSX bridge area will begin at 7:00 PM on Wednesday, August 30, 2011 to set temporary concrete barrier along the southbound travel lane. The activity will end at approximately 6:00 A.M. on Thursday, September 1, 2011.

All motorists traveling through this area of the project are asked to be aware of equipment and crews in the vicinity of the roadway. Speeds will be reduced to 35mph in areas where roadwork requires lane closures.

Flaggers and lane closures will be present to control traffic while this work is conducted. Motorists will experience traffic stoppages and are urged to use caution while in the construction zone.

The public is also asked to notice traffic control signs, reductions in speed limits and message board information, and to note that all road work is dependent on the weather.
